

# Manual Circular Metal Saw

This manual circular metal saw is designed for cutting metal materials with precision. It features an adjustable head for angled cuts and a coolant system to improve cutting efficiency and extend blade life.

## ADDITIONAL IMAGES

## Product Overview

### Professional Metal Cutting Solution

This manual circular metal saw is engineered for precision and reliability in metal fabrication workshops. Featuring a powerful, maintenance-free motor and a robust machine substructure, it ensures stable and efficient operation for various metal cutting tasks. The inclusion of a highly readable angular scale and rapid mitre adjustment capabilities allows operators to achieve accurate, angled cuts with ease.

## Technical Specifications

### Motor Type

Powerful • Maintenance-free

### Head Swivel Range

±45°

## Features & Functionality

### Key Features

- Rapid mitre adjustment
- Well-readable angular scale for precision
- Solid machine substructure
- Mounting holes for material stands on both sides

### Clamping System

Manual clamping with rapid adjustment
