

Manual Citrus Juice Extractor

This citrus juicer efficiently extracts fresh juice from various citrus fruits. Its design includes a feeding tube, a juice collection container, and a separate container for pulp, ensuring ease of use and cleaning.

Product Overview

Efficient Citrus Extraction

This citrus juice extractor is engineered for maximum yield through a low-speed squeezing process that ensures complete juice extraction. Equipped with a durable DC motor, the unit is designed for an extended operational lifespan. Its quiet operation and slow-speed gears make it a safe and reliable choice for any kitchen environment.
