

Manual Edge Banding Machine

This manual edge banding machine is designed for applying edge banding to various panel materials. It features adjustable pressure rollers for consistent bonding and a trimming unit for clean edge finishing.

Overview

Professional Edge Banding Solution

This manual edge banding machine is engineered for precision and reliability in applying edge banding to a variety of panel materials. Its compact and robust construction ensures stable operation, making it an ideal choice for small to medium-sized workshops. Equipped with adjustable pressure rollers and a dedicated trimming unit, it delivers consistent bonding and clean edge finishing for professional results.
