

Manual Floor Sweeper with Rotating Brush

This manual floor sweeper utilizes a rotating brush system to efficiently collect dirt and debris. It is suitable for hard surfaces and carpets, offering an eco-friendly cleaning solution without the need for electricity or batteries.

Product Overview

Efficient Manual Cleaning Solution

This manual floor sweeper is engineered for efficient dirt and debris collection on both hard surfaces and carpets. Featuring a robust rotating brush system, it offers a lightweight and easy-to-manuever design suitable for various environments. Because it operates without electricity or batteries, it serves as an eco-friendly and cost-effective cleaning solution for professional and commercial spaces.
