

Manual Floor Sweeper with Telescopic Handle

This manual floor sweeper features a telescopic handle and a rotating brush head. The sweeper is lightweight for easy maneuverability and efficient cleaning of hard floors.

Product Overview

Efficient Manual Cleaning Solution

This manual floor sweeper is designed for rapid cleaning of hard floor surfaces, combining efficiency with user-friendly ergonomics. Featuring a lightweight frame and a specialized rotating brush system, it effectively captures dust and debris without the need for electricity or batteries. The integrated telescopic handle allows operators to adjust the height for maximum comfort during use, making it an ideal choice for quick-response maintenance tasks.
