

Manual Hand Saw with Hardened Blade

This hand saw features double ground teeth that are hardened for efficient cutting. It has a 65Mn steel blade and a plastic handle with a soft touch.

Product Overview

Professional Hand Saw

This 18-inch manual hand saw features precision-ground teeth designed for efficient crosscutting and ripping tasks. Engineered with a high-density, induction-quenched hardened blade, it offers enhanced durability and cutting speed. The ergonomic, soft-touch rubber handle ensures user comfort during extended use, making it an ideal tool for professional woodworkers.

Technical Specifications

Blade Material	65Mn Steel
Blade Length	18 inch
Teeth Technology	Induction Quenched, Double Ground, Hardened
