## Product Overview

### Versatile Manual Sealing Solution

This manual hand sealer is an efficient, reliable tool designed for sealing various types of plastic bags, making it ideal for packaging candy, food items, stationery, and medicine. Featuring an eight-gear adjustment system, it allows users to customize the heating time based on the specific thickness of the material. The device operates intuitively: simply place the bag on the sealing surface and press the handle, with the indicator light signaling when the process is complete.

## Technical Specifications

### Recommended Sealing Time

**1.5 sec**

General Setting

**2 sec**

Max Setting

### Gear Adjustments

8

### Suitable Applications

Food Packaging, Candy, Stationery, Medicine, General Goods

## Operation & Troubleshooting

### Common Issues & Solutions

Issue	Cause	Solution
Sealing part damaged	Heating time too long	Turn knob counter-clockwise
Seal not firm	Heating time too short	Turn knob clockwise
Bag stuck to plate	Insufficient cooling time	Hold handle longer before release

### How to Use

- Plug AC power cord into socket
- Adjust heating time knob based on material thickness
- Place plastic bag on sealing surface
- Press handle to initiate circuit
- Wait for indicator light to turn off
- Hold for 1-2 seconds for cooling, then release
