

Manual Hand Sealer

This hand sealing machine is compact and efficient for sealing various packaging materials. Its durable aluminum body ensures longevity and consistent performance.

Product Overview

Compact Aluminum Hand Sealer

This manual hand sealing machine is a compact and efficient solution designed for sealing various types of packaging materials. Constructed with a durable aluminum body, it ensures longevity and consistent performance for small to medium-scale operations. It features an adjustable sealing time control, allowing users to customize the process according to material thickness, while the ergonomic handle reduces operator fatigue.

Technical Specifications

Model	SF-200
Voltage	110V/220V 50-60HZ

Certifications & Compliance

Certifications	CE
