

# Manual Heat Sealer

This is a compact, hand-operated sealing machine ideal for sealing plastic bags. It features an adjustable sealing timer and a handle for portability.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Manual Heat Sealer

This manual heat sealer is an efficient, compact solution for sealing plastic bags used in food, medicine, stationery, and general goods packaging. Designed for small-scale operations, it features an adjustable heating timer to accommodate various bag thicknesses, ensuring a secure and airtight seal every time. The device is energy-efficient, consuming no power when the handle is not pressed, and offers simple, intuitive operation for consistent packaging results.

## Technical Specifications

### Operational Features

- Manual handle-operated mechanism
- Adjustable 8-gear heating timer
- Automatic power disconnection after sealing cycle
- Indicator light for cycle completion
- Energy-saving design (no power consumption when idle)

### Usage Guidelines

Scenario	Adjustment Recommendation
Sealing part damaged	Turn knob counter-clockwise to shorten time
Seal not firm	Turn knob clockwise to extend time
Bag stuck to plate	Increase cooling time by holding handle longer

<b>Applications</b>	Food Packaging, Medical Supplies, Stationery, General Merchandise
<b>Power Source</b>	AC Power
