

Manual Hydraulic Hand Pump

This steel hand pump is a manually operated hydraulic pump designed for industrial applications. It features a reservoir for hydraulic fluid and a pressure release valve for controlled pressure release.

Product Overview

Industrial Manual Hydraulic Pump

This manual hydraulic pump features a durable steel construction designed for demanding industrial and automotive applications. Its two-speed operation significantly reduces operator fatigue while providing efficient hydraulic power. With built-in internal pressure relief valves, the system ensures consistent overload protection for safer operation during high-pressure tasks.

Performance Metrics

Maximum Pressure

70 MPa

Maximum Pressure

Technical Specifications

Model Specifications

Model	Capacity	Weight
P77	770 cm³	6.8 kg
P80	2200 cm³	15 kg
P601	4000 cm³	20 kg

Key Features

- Two-speed operation
- Internal pressure relief valve
- Steel construction
- Comfortable grip handle

Piston Stroke

25.4 mm
