Product Overview

Heavy-Duty Manual Hydraulic Jack

This manual hydraulic jack is engineered for industrial-grade heavy lifting, providing a stable and secure platform for large machinery and equipment. Featuring a low toe height, it is specifically designed to slide under low-clearance loads, making it an essential tool for construction, automotive, and industrial maintenance. Its rugged construction ensures long-term durability and reliable performance in demanding work environments.

Technical Specifications

Key Features

- Low toe height for low clearance access
- Rugged industrial-grade construction
- Spring-return mechanism
- Stable lifting platform

Available Capacities

5 Ton, 10 Ton

Operation

Manual lever operation with controlled lifting and lowering

Applications

Suitable Industries

Construction • Automotive Repair • Industrial Manufacturing • Machinery Handling
