

Manual Hydraulic Platform Stacker

This platform stacker is a manually operated lifting device for raising and transporting loads. It is constructed with a steel frame, yellow powder coating, hydraulic lifting mechanism, and swivel casters.

Overview

Industrial Platform Stacker

The PS400 series manual platform stacker is a professional lifting solution designed for heavy-duty material handling in warehouses and workshops. Featuring a robust steel frame and a powder-coated finish, this unit ensures exceptional durability and longevity. With an intuitive foot-pedal hydraulic system, it provides safe and controlled vertical transport of loads up to 400 kg.

Performance Specifications

Load Capacity

400 kgs

Rated Capacity

Lifting Height Range

850 - 1700 mm

Design and Build

Material

Robust Steel

Finish

Yellow Powder Coated, Wear Resistant

Operational Features

Included Components

- Adjustable forks
- Platform attachment
- Swivel casters

Lifting Mechanism

Manual Hydraulic Foot Pedal
