

Manual Impulse Heat Sealer

The impulse heat sealer is a manually operated machine used to seal thermoplastic materials using heat. It features an adjustable timer to control the sealing duration, ensuring consistent and secure seals for various bag thicknesses.

Product Overview

Professional Impulse Heat Sealer

This manually operated impulse heat sealer provides a professional solution for sealing thermoplastic materials with precision. Designed for consistency, it features an adjustable timer to accommodate various bag thicknesses, ensuring secure and tamper-evident results. Its compact form factor makes it an ideal choice for small to medium-scale operations requiring airtight packaging for food, electronics, and various industrial components.

Technical Specifications

Control Features

- Adjustable sealing duration timer
- Visual operating instructions

Sealing Method	Impulse heat sealing
Operation	Manual

Application Suitability

Industry Applications	Food Packaging, Electronic Components, Industrial Goods
-----------------------	---

Performance

Seal Integrity
Airtight • Tamper-evident
