

Manual Jab Saw for Drywall

This manual jab saw is designed for cutting through drywall and plasterboard. It features an ergonomic handle with rubberized sections for enhanced control and reduced slippage.

Product Overview

Professional Manual Jab Saw

This manual jab saw is specifically engineered for precision cutting in drywall, plasterboard, and similar building materials. Featuring an aggressive, sharp-toothed blade, it is ideal for creating clean openings for electrical boxes, plumbing pipes, and other fixtures in walls and ceilings. The ergonomically designed handle with rubberized grips ensures maximum control and comfort during extended use.

Technical Specifications

Handle Characteristics
