

Manual Lever Clipper

This manually operated clipper is designed for secure and efficient fastening. It features a robust construction with a lever-action mechanism for applying consistent pressure.

Product Overview

Professional Manual Clipping Solution

This manual lever clipper is designed for efficiency and reliability in food processing environments. Featuring a compact and lightweight construction, it offers a simple, robust structure that ensures consistent performance. Its corrosion-resistant build guarantees a long lifespan, making it an ideal entry-level tool for meat-borne food production.

Key Features

Core Benefits

Compact Design, Lightweight, Corrosion Resistant, Manual Operation, Reliable Performance
