

Manual Lever Diaphragm Pump for Fuel Transfer

This manual lever diaphragm pump is easy to operate and delivers high performance. It is suitable for gasoline, diesel fuel, fuel oil, motor oil, and other light petroleum products.

Product Overview

Manual Lever Diaphragm Pump

This manual lever diaphragm pump is an essential tool for transferring fuel and light petroleum products where electricity or compressed air is unavailable. Designed for versatility and durability, it is ideal for use on farms, construction sites, and marine environments. The pump features a robust construction and includes a telescopic suction tube with a non-return valve for efficient operation.

Performance

Flow Rate

1 L/stroke

Flow Rate

Compatibility
