Overview

Manual Liquid Transfer Siphon Pump

This manual liquid transfer siphon pump is a versatile and efficient tool designed for the safe transfer of various liquids, including fuel, water, and non-corrosive chemicals. Constructed from durable, non-toxic plastic materials, it provides a reliable solution for emergency refueling or fluid management in automotive and industrial settings. With multiple models available, this pump series accommodates different flow rate requirements and container depths, ensuring compatibility with a wide range of operational needs.

Application & Material

Construction Material

PE • PP • Non-toxic Plastic

Compatible Liquids

Gasoline, Diesel, Kerosene, Light Oils, Water, Chemical Insecticides, Toluene, Light Solvents, Alcoholic Drinks

Technical Specifications

Model Specifications

Model	Flow Rate (L/min)	Net Weight (g)	Qty/Ctn
ORIENT801-10	4	35	200
ORIENT801-14	6.5	53	120
ORIENT801-15	12	120	60
ORIENT801-23	17.5	235	40
ORIENT801-25	19	355	30
ORIENT801-25H	21	387	36

High-Capacity Performance

21 L/min

Max Delivery Volume

1400 mm

Max Discharge Tube Length
