

Manual Metal Cutting and Bending Machine

This heavy-duty machine is designed for cutting and folding various materials. It features a robust construction and integrated wheels for portability.

Overview

Industrial Precision Cutting and Bending

This heavy-duty manual machine is engineered for versatile metal fabrication tasks, combining cutting and bending capabilities in a single unit. Designed for industrial environments, it features a robust construction that ensures long-term durability and operational stability. The integrated wheel system provides essential portability, allowing operators to easily reposition the equipment within the workshop for maximum efficiency.

Key Features

Capabilities	Metal Cutting, Metal Bending, Manual Operation
Safety Equipment	Yes

Design & Build

Build Quality
Heavy-duty • Industrial Grade

Portability	Yes
