Overview

Versatile Metalworking Solution

The C0632A conventional lathe is a robust and versatile machine tool engineered for precision turning, facing, threading, and drilling operations. Designed for stability and consistent performance, it features a geared headstock and a user-friendly control interface suitable for small to medium-sized workshops and educational institutions. With its flexible configuration, this lathe handles a wide range of materials, including metals, plastics, and composites.

Key Features

Safety Features

Emergency Stop • Interlocks

Machine Capabilities

Turning, Facing, Threading, Drilling, Tapping

Technical Specs

Performance Metrics

1250 RPM

Max Spindle Speed

300 mm

Swing Over Bed

Mechanical Components

- Geared headstock
- Lead screw
- Feed rod
- Carriage with longitudinal and cross feeds
- Tailstock
- Compound rest

Gear Configuration

Gear Type	Specification
Gear 1	32T
Gear 2	30T
Gear 3	28T
