

Manual Pallet Jack 2000-3000 kg Capacity

This manual pallet jack is designed for lifting and moving pallets. It features a hydraulic pump system activated by a handle and heavy-duty steel forks.

Overview

Industrial Manual Pallet Jack

This manual pallet jack is designed for reliable lifting and transportation of heavy loads in warehouse and industrial environments. Featuring a robust hydraulic pump system operated via a manual handle, it allows for efficient raising and lowering of forks. Constructed from heavy-duty steel, the unit is built to withstand significant weight capacities, ensuring durability and consistent performance in demanding material handling tasks.

Performance

Load Capacity Range

2000 kg

Minimum Capacity

3000 kg

Maximum Capacity

Construction

Material	Heavy-duty steel
Operation	Manual hydraulic pump

Features

Mobility

- Integrated wheel system
- Smooth maneuverability
- Multi-surface compatibility

Suitable Applications	Warehouse, Industrial, Material Handling
