Product Overview

Robust Material Handling Solution

This manual pallet truck is engineered for durability and reliability in demanding warehouse and industrial environments. Featuring a reinforced steel frame and a precision-cast carbon steel hydraulic pump, it is designed to withstand heavy daily use without deformation or oil leakage. The ergonomic design ensures comfortable operation, making it an essential tool for efficient palletized load transport.

Technical Specifications

Build Materials

- Carbon structural steel frame
- Precision-cast carbon steel oil pump
- Hard-chrome plated piston rods

Key Features

Reinforced Ribbing • Leak-Proof Design • Wear-Resistant Finish • Ergonomic Handle

Available Load Capacities

2000kg, 2500kg, 3000kg

Performance

Hydraulic System Performance

0 None

Oil Leakage
