

# Manual Pallet Truck with PU/Nylon Wheels

Manual pallet trucks facilitate the horizontal movement of palletized goods. They feature a hydraulic lift mechanism, steel frames, and durable wheels.

## Product Overview

### Robust Manual Pallet Truck

This manual pallet truck is designed for the efficient horizontal movement of palletized goods in demanding warehouse and industrial environments. Featuring a durable integrated hydraulic pump and a reinforced 4mm steel frame, it ensures reliable performance for daily operations. With flexible configuration options for load capacity and fork width, this truck is an ideal solution for loading docks and manufacturing facilities.

## Technical Specifications

### Load Capacities

- 2 Ton
- 2.5 Ton
- 3.0 Ton

### Fork Width Options

- 550 mm
- 685 mm

### Steel Thickness

4 mm

## Construction & Materials

### Available Wheel Materials

PU, Nylon

### Hydraulic System

Integrated white hydraulic pump

## Key Metrics

### Performance Highlights
