

Manual Parking Space Lock

This manual parking lock secures parking spaces. It features a key-operated locking mechanism.

Overview

Manual Parking Space Lock

This manual parking lock series offers an economical and reliable solution for securing private parking spaces. Constructed from heavy-duty steel with a durable galvanized finish, it is designed to withstand harsh weather conditions and resist corrosion. Its foldable design allows for convenient storage when the space is not in use, while the key-operated mechanism ensures that only authorized users can access the parking spot.
