

Manual Paver Block Splitter with 530mm Blade

This manual paver block splitter features a 530mm hardened blade for efficient splitting of paving stones and blocks. Its spring-supported platform and two-wheel design ensure smooth operation and maneuverability.

Product Overview

Professional Manual Paver Splitter

The Manual Paver Block Splitter is a robust, non-powered tool engineered for precise and efficient cutting of paving stones and blocks. Designed for high maneuverability on construction sites, it features a spring-supported platform and a hardened blade for long-lasting performance. This tool provides a clean, dust-free alternative to power saws, making it an ideal choice for landscaping and professional paving projects.

Technical Specifications

Cutting Capacity

530 mm
Blade Length

140 mm
Max Split Opening

54 kg
Weight

Model

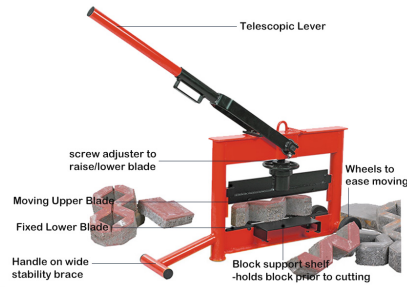

QTP5153

Key Features

Operational Highlights

- Smooth splitting action
- Spring supported platform
- Hardened blade for longer operating life
- High maneuverability with 2 integrated wheels

Design & Operation

Detailed view of the splitter components, including the adjustable blade system, telescopic lever, and integrated support shelf.

Design Components

Component	Function
Telescopic Lever	Provides enhanced leverage
Screw Adjuster	Raises or lowers blade for block thickness
Dual Blade System	Moving upper and fixed lower blade for clean cuts
Support Shelf	Holds blocks securely prior to cutting
