

Manual Paver Block Splitter with 530mm Blade

This manual paver splitter features a 530mm blade for efficient block splitting. Its two-wheel design ensures easy maneuverability on job sites.

Overview

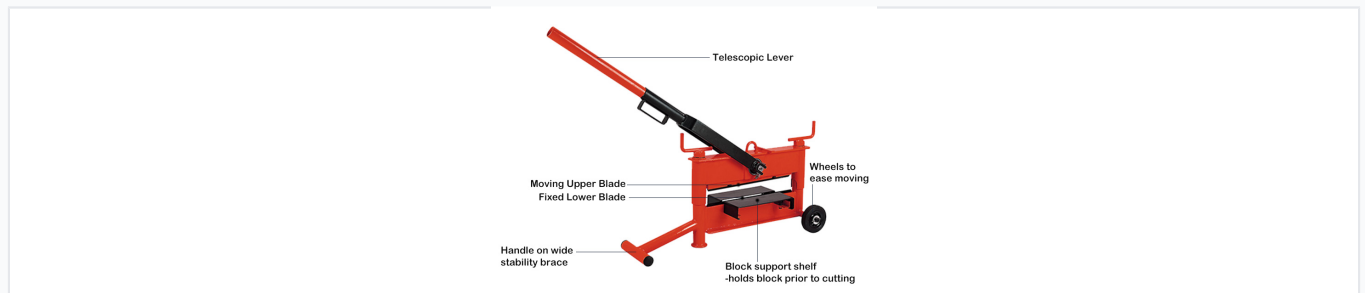

Professional Paver Block Splitting

This manual paver block splitter is designed for high-efficiency, precision cutting on construction and landscaping sites. Featuring a robust 530mm blade and a spring-supported platform, it ensures clean, accurate splits for various block thicknesses up to 140mm. Built for durability with a hardened blade, the unit includes integrated wheels for superior job site maneuverability and a lever-action design to reduce operator fatigue.

Technical Specifications

Cutting Length	530 mm
Max Split Opening	140 mm
Weight	57 kg

Features
