

Manual Pipe Bending Tool

This is a manual pipe bending tool. It is designed with a bending frame, supports, and interchangeable dies for different pipe sizes.

Product Overview

Manual Pipe Bending Solution

This manual pipe bending tool is designed for efficient pipe shaping tasks in plumbing and construction environments. Featuring a robust bending frame and support structure, the device offers reliable performance for bending operations. The design includes interchangeable components, allowing for versatility when working with different pipe configurations.

Technical Specifications

Included Components

- Bending frame
- Support structure
- Interchangeable dies
- Manual bending accessories

Operation Mode	Manual
Color Scheme	Green, Yellow, Red, Silver
