

Manual Pump Sprayer with Adjustable Nozzles

This manual pump sprayer features an ergonomic design that mimics the natural curve of the human back. It has adjustable nozzles and is made from quality materials for resistance to acid, alkali, abrasion and corrosion, ensuring a long service life.

Product Overview

The sprayer features an ergonomic design for comfort and includes multiple nozzle types for versatile application.

Ergonomic Manual Sprayer

This manual pump sprayer is designed with a focus on user comfort, featuring a back-contoured shape that mimics the human body for easier carrying. It utilizes a compact, integrated air chamber and pump system built directly into the medicine tank for enhanced reliability. With its durable, corrosion-resistant construction and versatile nozzle options, it provides a flexible solution for various agricultural and horticultural spraying tasks.

Design & Construction

Design Features

- Back-contoured design for user comfort
- Integrated air chamber and pump unit
- Compact and reliable structure
- PU leather bowl for lightweight, efficient boosting

Performance & Operation

Material Durability

- Acid resistant
- Alkali resistant
- Abrasion resistant
- Corrosion resistant
- High sealing performance

Performance Features

Diaphragm pressure switch, Leak-resistant, Continuous spraying, Spot spraying

Accessories

Included Nozzles

Double Nozzles • Fan Nozzles • Hollow Cone Nozzles • Adjustable Single Nozzles
