

Manual Push Seeder for Row Crops

This manual push seeder is designed for efficient and precise planting. It features adjustable depth control and consistent seed spacing, making it ideal for small to medium-sized gardens.

Product Overview

Efficient Manual Seeding Solution

This manual push seeder is designed for efficient and precise seed planting in various terrains, including fields and hills. It features a durable construction with a transparent seed hopper for easy monitoring and an ergonomic handle for comfortable operation. With adjustable settings for seed spacing and planting depth, it ensures uniform seed placement and optimal soil contact for improved crop yields.

Performance Metrics

Fertilization Depth

50 mm

Minimum Depth

60 mm

Maximum Depth

Seed Box Capacity

4 kg

Technical Specifications
