

Manual Radiator Valve with Brass Body

This radiator valve controls the flow of hot water in heating systems. It features a durable brass body and a manual control knob for adjusting water flow and temperature.

Product Overview

Manual Radiator Valve

This manual radiator valve is designed for precise control of hot water flow in residential and commercial heating systems. Constructed with a durable brass body, it offers excellent resistance to corrosion and ensures long-term operational reliability. The valve features a manual control knob for intuitive temperature adjustment and includes secure threaded connections for leak-proof installation.
