

Manual Screw Oil Press

This oil press is designed for extracting oil from various oil-bearing seeds and nuts. It features a feeding hopper, pressing chamber with a screw mechanism, and a sturdy stand.

Product Overview

Manual Screw Oil Press

This manual screw oil press is a robust, reliable solution designed for efficient oil extraction from a wide variety of oil-bearing seeds and nuts. Built with durable materials to withstand continuous operation, it features a stable mounting stand and a manual crank handle for easy, hands-on control. It is an ideal choice for small to medium-scale oil production environments requiring dependable, non-electric performance.

Technical Details

Operation Type

Manual • Hand-cranked

Model Number

6YL-68J

Construction

Durable Metal, Heavy-duty Stand

Key Features

Core Components

- Feeding Hopper
- Screw Pressing Chamber
- Oil Outlet
- Manual Crank Handle
- Stabilizing Stand

Best For

Small-scale Production, Medium-scale Production, Seed Oil Extraction, Nut Oil Extraction
