

Manual Sheet Metal Shear

This hand-operated shear is designed for cutting sheet metal. It features a lever-action mechanism and hardened steel blades for clean, precise cuts.

Product Overview

Professional Manual Sheet Metal Shear

The PBS-8 is a robust, hand-operated shear engineered specifically for precise sheet metal cutting. Featuring a heavy-duty construction and a stable, sturdy base, this tool utilizes a high-leverage mechanism to deliver significant cutting force with minimal operator effort. Designed for workshops and garages, it combines hardened steel blades with an adjustable material guide to ensure clean, accurate results every time.

Technical Specifications

Operation	Manual Lever-Action
Blade Material	Hardened Steel
Key Features	Heavy-duty construction, Adjustable material guide, Ergonomic handle, Stable base

Application

Ideal Environments

- Professional Workshops
- Garages
- Metal Fabrication Areas
