

Manual Sprayer and Spreader with Adjustable Nozzle

This is a portable spraying or spreading device with a copper-colored tank and black nozzle assembly. It includes a control knob and handle for the controlled application of liquids or powders.

Product Overview

Professional Manual Spraying and Spreading Equipment

This manual sprayer and spreader is designed for the precise application of liquids and powders in various professional settings. Featuring an ergonomic manual handle and an adjustable nozzle control, it allows for consistent flow rates and targeted delivery. Its portable construction makes it an ideal tool for maintenance tasks, facility sanitation, or agricultural applications where maneuverability is essential.
