

Manual Steering Rack and Tie Rod End Kit

This kit includes a manual steering rack and tie rod ends. The tie rod ends allow movement and articulation as the wheels are steered.

Overview

Manual Steering System Components

This manual steering rack and tie rod end kit is designed to provide precise directional control for vehicle steering systems. The assembly features a central housing protected by durable bellows to prevent contamination from dirt and moisture, ensuring longevity and consistent performance. This kit effectively converts the rotational input from the steering wheel into the necessary linear motion at the wheels, making it an essential component for vehicle maneuverability.

Technical Specifications

Included Components

- Steering Rack
- Tie Rod Ends
- Protective Bellows/Boots

Steering Type	Manual
Design Features	Contaminant Protection, Linear Motion Conversion, Articulating Tie Rods
