

Manual Tape Wrapping Machine for Coils

This machine features a cast iron body for durability and ease of use. It is suitable for wrapping tape around various coils in transformers, relays, and other components.

Product Overview

Professional Manual Tape Wrapping Solution

This manual tape wrapping machine features a robust cast iron body designed for long-term durability and reliable performance. It is specifically engineered to handle a wide range of components including transformers, relays, and various coils. The simple operation makes it a cost-effective choice for small-scale production environments, repair workshops, and laboratories requiring precise, controlled manual wrapping.

Technical Specifications

Target Components

- Transformers
- Relays
- Coils
- Cylindrical objects

Body Material	Cast Iron
Operation Mode	Manual hand crank

Compliance & Quality

Standard Quality
Excellent Quality

Quality Certifications	CE, ISO 9001
