

Manual Terminal Crimping Machine for Packaging

This is a precision crimping machine designed for packaging applications. It features a robust metal construction with multiple adjustment knobs and levers for precise control over the crimping process.

Product Overview

Precision Manual Crimping Solution

This manual terminal crimping machine is engineered for high-precision packaging and assembly applications. Featuring a robust metal construction, it provides stable and reliable performance for crimping terminals or connectors onto wires. Its compact design ensures seamless integration into existing packaging assembly lines, offering operators precise control through adjustable levers and knobs.

Technical Specifications

Construction

Robust Metal • Industrial Grade

Adjustment Controls

- Adjustment Knobs
- Control Levers

Machine Type

Terminal Applicator

Operation Mode

Manual

Primary Application

Packaging, Terminal Crimping, Wire Assembly
