Product Overview

Professional Versatility

This manual tile cutter is engineered to handle a wide variety of building materials including ceramic, porcelain, and vitrified tiles. The system supports advanced processing capabilities such as 45-degree chamfering, straight-edge grinding, and anti-skid groove cutting. With its integrated water cooling and stable construction, it ensures precise, clean cuts while minimizing dust and protecting blade longevity.

Technical Specifications

Processing Functions

- Straight Cutting
- 45-Degree Chamfering
- Straight Edge Grinding
- Arc Grinding
- Anti-skid Groove Cutting

Supported Materials

Ceramic Tiles, Porcelain Tiles, Vitrified Tiles, Mosaic Tiles, Natural Stone

Design and Utility

Performance Metrics

45 degrees

Chamfering Capability

Construction Features

- Water cooling system
- Sturdy base for stability
- Integrated water reservoir
- Adjustable rip fence
- Miter gauge
