Overview

Professional Manual Tile Cutter

The 8100K-2 is a high-precision manual tile cutter engineered for professional performance on ceramic, porcelain, and mosaic tiles. Featuring an integrated aluminum base for rigidity and 20mm hard chromed solid rods, it ensures smooth scoring and stable operation. This versatile tool is designed for both durability and portability, making it an essential choice for demanding tiling projects.

Cutting Performance

Available Cutting Angles

0° • 45°

Max Cutting Thickness

16 mm

Technical Specifications

SIZE							
8100K-2650	650mm	450mm	16mm	Ø10mm	2	19.5/18.5kg	94*25.5*28cm

Detailed technical parameters and dimensions for the 8100K-2 series variants.

Model Specifications

Model	Cutting Length (mm)	Diagonal Width (mm)	Wheel Dia. (mm)	Weight (kg)
8100K-2650	650	450	Ø10mm	19.5/18.5
8100K-2800	800	565	Ø10mm	22.5/21.5
8100K-2900	900	635	Ø10mm	24.5/23.5

Build & Construction

Guide Rods

20 mm

Hard Chromed Rods

Base Material

Integrated aluminum die-casting for rigidity and stability

Key Features

Core Features

- Sliding bar with durable ball bearings for smooth scoring
- Lockable breaking device for optimal visibility
- Adjustable extension arms for large, heavy tiles
- Simple replaceable cutting pencil system
- Aluminum die-casting gauge for precision angles
- Lightweight design for easy transport

Applications

Compatible Materials

Ceramic, Porcelain, Mosaics

Logistics

Standard Packaging

2 pieces per box
