Product Overview

Efficient Soil Aeration

This manual twist tiller is a robust gardening tool designed for effortless soil loosening and aeration. Featuring an ergonomic T-shaped handle and a durable helical metal head, it allows users to penetrate and break up compacted earth with minimal physical strain. It is an ideal solution for preparing small gardens, flower beds, and vegetable patches for planting.

Physical Characteristics

Material	Durable metal
Finish	Blue painted coating

Design Features

Handle Design	T-shaped for leverage
Tilling Mechanism	Helical/Spiral head with pointed tines

Usage & Application

Key Benefits

- Ergonomic grip reduces strain
- Helical design penetrates compacted soil easily
- Durable construction for repeated use
- Compact size for small garden spaces

Operation	Manual twisting motion
Best For	Soil Aeration, Weed Removal, Garden Bed Preparation, Raised Planters
