

Manual Wire Rope Hoist

This manual lifting device is designed for heavy-duty applications. It utilizes a wire rope and lever system to provide mechanical advantage when lifting and pulling loads.

Overview

Heavy-Duty Manual Lifting Solution

The Manual Wire Rope Hoist is a robust lifting device engineered for demanding heavy-duty applications in construction, manufacturing, and maintenance. Utilizing a reliable wire rope and lever system, it provides significant mechanical advantage for lifting, pulling, and positioning heavy objects. Built with high-strength components and a durable housing, this hoist ensures consistent performance and safety in challenging industrial environments.

Technical Specifications

Operation Type	Manual
Mechanism	Wire rope and lever system

Safety & Compliance

Safety Features	Overload Protection, Secure Locking Mechanism
-----------------	---

Applications

Common Applications

- Construction
- Manufacturing
- Maintenance Operations
- Load Positioning
- Heavy Object Securing
