

# Marble and Terrazzo Floor Polishing Machine

This floor polishing machine is designed for cleaning and polishing marble, terrazzo, and other hard surfaces. It features a water tank for wet polishing, a rotating brush head, and an adjustable handle for user comfort and control.

## ADDITIONAL IMAGES

## Product Overview

### Professional Floor Maintenance Solution

This high-performance floor machine is designed for efficient marble, terrazzo, and epoxy floor maintenance, including wet polishing and cleaning. Featuring a durable stainless steel control panel and a sleek golden appearance, it combines industrial reliability with ease of use. The unit offers a separable design for convenient transport and a collapsible handle for ergonomic operation, making it an ideal choice for heavy-duty commercial environments.

## Performance Metrics

### Core Performance

**175 rpm**

Rotation Speed

**60 dba**

Noise Level

## Technical Specifications

### Detailed Technical Data

Parameter	Specification
Model	OKT-200
Weight	45 kg
Motor Power	1.5/2/2.5 HP
Voltage	220 V
Working Width	10/17 mm
Dust Collection Capacity	15 L
Current	6-7 A
Power Cord Length	15 m

## Key Advantages

### Features & Benefits

- Smooth and stable to operate
- Collapsible handgrip for comfort
- Safe and efficient operation
- Energy-saving motor design
- Stainless steel concentrate controller panel
- Separable motor and body for easy mobility

### Surface Compatibility

Marble, Terrazzo, Epoxy
