Overview

High-Performance Stone Cutting Solution

This specialized power tool is engineered for the precise and efficient cutting of marble, granite, ceramic tiles, and various stone materials. Equipped with a high-speed motor and a robust diamond blade, it delivers clean, accurate cuts suitable for both professional stone fabricators and DIY enthusiasts. The integrated water cooling system effectively manages dust and heat, ensuring consistent performance and extended blade longevity.

Technical Specifications

Blade Dimensions

114 mm
Diameter

20 mm
Bore

1.9 mm
Thickness

Cutting Capabilities

Marble, Granite, Ceramic Tile, Stone

Features

Core Features

- High-speed motor for hard material processing
- Integrated water cooling system for dust reduction
- Adjustable base plate for bevel cuts
- Durable construction for long-term use

Target User

Professional • DIY
