Product Overview

Precision Marble Engraving Solution

This compact CNC router is engineered specifically for the precision engraving and cutting of marble, stone, and other hard materials. Featuring dual engraving heads, the system allows for simultaneous processing, significantly increasing productivity and reducing production time. Its robust, rigid frame ensures stability and accuracy, while the integrated cooling system prevents overheating during extended operation, making it an ideal choice for workshops with limited space.

Technical Specifications

Available Worktable Sizes

- 400*400mm
- 600*600mm

Performance Metrics

2 heads

Engraving Heads

Model Number

KC4040-2H

Key Features

System Benefits

Compact Design • Coolant System Included • Robust Construction • High-Precision Components

Engraving Capability

Dual Heads, Simultaneous Processing, Intricate Designs, Lettering, Relief Carving
