

Marine Accommodation Winch

This heavy-duty winch is designed for accommodation purposes on marine vessels. It is available in models with hoisting power from 6KN to 16KN.

Product Overview

Marine Accommodation Winch

Designed for demanding maritime environments, these winches are primarily used for handling accommodation ladders during vessel berthing and pilot ladders when entering harbors. They feature a robust construction engineered to ensure reliable operation and safety in critical docking scenarios. With a range of load capacities available, these units provide efficient cable management and consistent performance for various vessel types.

Technical Specifications

Performance Data

Model (kN)	Working Load (kN)	Supporting Load (kN)	Rope Dia (mm)
6	6	18	8
8	8	24	9
10	10	30	11
12	12	36	12
16	16	48	13

Available Models

6 kN, 8 kN, 10 kN, 12 kN, 16 kN

Duty Factor

30 min
