Product Overview

Industrial Marine Air Solutions

These professional-grade air compressor units are designed specifically for demanding shipboard applications, ranging from engine starting to general service air. Our stock includes a comprehensive variety of piston and screw-type compressors with high-pressure capabilities, available in both reconditioned and new conditions. These robust units are engineered to operate reliably in marine environments, featuring integrated electric motors and durable construction for long-term service.

Available Conditions

Reconditioned • Used • Brand New

Technical Capabilities

Operational Performance Range

4.5 m3/h

Min Capacity

565 m3/h

Max Capacity

30 kg/cm2

Typical Operating Pressure

Power Requirements

380V 50Hz, 440V 60Hz

Inventory Details

Stock Specifications

Feature	Range/Details
Motor Power	1.7kW - 162kW
Operating Speed	600 - 1800 RPM
Weight Range	870kg - 4225kg

Additional Services

Included Support
