

Marine Air Compressor

This air compressor is designed for marine applications. It provides compressed air for various onboard systems in ships and other marine vessels.

Overview

Marine Air Compressor System

This marine-grade air compressor is engineered for reliability and high-performance operation in demanding maritime environments. Designed with a robust base frame for stability and vibration dampening, it provides a consistent supply of compressed air for essential onboard systems. The unit features a horizontally opposed cylinder configuration and comes equipped with an integrated electric motor and efficient cooling system.

Technical Specifications

Key Performance Metrics

300 m3/h
Max Capacity

900 RPM
Speed

30 kgf/cm2
Pressure

Available Unit Configurations

Model	Quantity
2TF5	3
2TF54	1
2TM63	1

Physical Properties

1310 kg
Weight

Manufacturing Year

1988
