

Marine Aluminum Sliding Window

Aluminum or steel marine sliding window designed for bolt or welded installation. It can be configured for left/right, up, or fixed opening.

Product Overview

Marine-Grade Sliding Window

This high-quality aluminum sliding window is specifically engineered for durability and weather resistance in demanding marine environments. It features a robust aluminum frame, a smooth-operating sliding mechanism, and a secure locking system to ensure safety. Designed for boats, ships, and various marine vessels, it provides excellent visibility and ventilation while maintaining a reliable watertight seal.
