

# Marine Anchor Release Device

This marine anchor release device is made from casting steel with a polished surface. It is designed for secure and efficient anchor deployment and retrieval.

## Product Overview

### Robust Marine Anchor Release Solution

The Marine Anchor Release Device is a robust and reliable piece of equipment designed for secure and efficient anchor deployment and retrieval. Constructed from heavy-duty materials with a corrosion-resistant coating, it is engineered to withstand the harsh conditions of marine environments. Featuring an integrated locking mechanism operated by a hand lever, this device ensures controlled release of the anchor chain, adhering to strict engineering standards for precision and durability.

## Technical Specifications

### Available Configurations

- Screw type chain cable compressor
- Roller lever chain stopper
- Devil's claw
- Simple machine for releasing anchor
- Screw type cable releaser
- Dog type cable clench

### Design Features

Corrosion-resistant, Heavy-duty construction, Cylindrical body, Angled top, Flanged base

### Operation Mechanism

Manual hand lever for controlled chain release
