Product Overview

Marine-Grade Flow Control

This Marine Bronze Angle Check Valve is engineered to effectively prevent backflow in critical piping systems. Constructed from high-quality bronze materials, it offers exceptional corrosion resistance suitable for demanding marine environments, including seawater, freshwater, and oil systems. Its angled body design facilitates efficient flow and compact installation, ensuring reliability and system integrity in tight spaces.

Standards & Compliance

JIS Standards	F7352, F7410
---------------	--------------

Materials of Construction

Body Material	BC6 Bronze
Bonnet Material	BC6 Bronze
Disc Material	BC6 Bronze
Stem Material	C3771BD or BE
Handwheel Material	FC200

Technical Details

Suitable Media

- Seawater
- Freshwater
- Oil systems

Valve Type	Angle Check Valve
