Product Overview

Marine Bronze Angle Valve

The JIS F7302/F7304 Marine Angle Valve is engineered for robust performance in demanding maritime environments. Constructed from high-quality bronze, this valve offers exceptional corrosion resistance and durability for various fluid control systems. Its flanged connection design ensures a secure, reliable installation, making it an ideal choice for professional marine piping applications.

Technical Specifications

Material Composition

Component	Material
Body	BC6
Bonnet	BC6
Disc	BC6
Stem	C3771BD or BE
Handwheel	FC200

Compliance Standards JIS F7302, JIS F7304

Connection Type Flanged
