Product Overview

Marine Bronze Rising Stem Gate Valve

This marine-grade gate valve is engineered for reliable flow control in demanding maritime environments. Featuring a robust bronze construction, it offers exceptional resistance to seawater corrosion, making it ideal for shipbuilding and offshore platform piping systems. The rising stem design provides clear visual indication of the valve's operational status, ensuring safety and efficiency in critical fluid management.

Technical Specifications

Material Composition

Component	Material
Body	BC6
Bonnet	BC6
Disc	BC6
Stem	C3771BD or BE
Handwheel	FC200

Gasket Material	Non-asbestos
-----------------	--------------

Compliance & Standards

Compliance Standards	JIS, Marine Grade
----------------------	-------------------
